Hydrofera Blue Classic
Polyvinyl Alcohol (PVA) Foam Dressings

Wound Characteristics:
- Deep, tunneling or shallow
- Infected or at risk of infection
- Moisture to heavy exudate
- Suspected biofilm
- Inhibited or at risk of infection

Clinical Benefits:
- Continuous wicking, highly absorptive
- Reduces biofilm accumulation
- Manages biofilm buildup
- Safe, non-cytotoxic
- Does not inhibit growth factors
- Atraumatic removal
- No film backing
- Waterproof & breathable
- Atraumatic removal
- Gentle on Skin
- Adhesive Border
- Perforated Silicone
- Intimate contact of foam to the wound bed

Powerful Wicking
- Wicks bacteria laden exudate into the foam and away from the wound surface with natural negative pressure through capillary flow.

Debridement
- Debrided tissue removed at dressing change.

THE SAFE NON-CYTOTOXIC CHOICE

Hydrofera Blue READY and READY-Transfer
Polyurethane (PU) Foam Dressings

Wound Characteristics:
- Shallow wounds
- Moderate to heavy exudate
- Slough & debris
- With or without devitalized tissue
- Deep, tunneling or shallow

Clinical Benefits:
- Shallow wounds
- Manages biofilm accumulation
- Safe, non-cytotoxic
- Kills bacteria in the dressing
- Up to 7-day wear time

READY dressing
Waterproof and bacteria resistant semi-permeable backing

READY-Transfer dressing
No film backing increases exudate management options

Exudate is transformed into secondary absorbent dressing

The Safe Non-Cytotoxic Choice
- Ideal for clinicians looking for an alternative to silver dressings
- Less expensive than many silver foam dressings
- Compatible for use with hyperbaric oxygen therapy (HBOT)
- Compatible with Growth factors and enzymatic debriders

Deep with Heavy Exudate

Shallow Wounds

Skin Tears

Under Total Contact Casting

With Compression

Leg Ulcers

Atraumatic removal

Acute wounds

Gentle on Skin Tears

Deep with Heavy Exudate

With Disposable NPWT

Removal of Devitalized Tissue

Safe, Effective, Protection from Start to Finish
Hydrofera Blue helps wounds heal faster at less cost

A recent retrospective study examining wound treatment data of more than 30,000 patients over a two-year period, Hydrofera Blue dressings combined with an Advanced Wound Management Program showed faster healing times and lower treatment costs.

Compared with other commonly used dressings, Hydrofera Blue showed a 7-day reduction in healing time and 24% reduction in nursing labour cost.

Compared with other advanced wound dressings on patients who were not on an Advanced Wound Management Program, Hydrofera Blue delivered over a 50% reduction in healing time and a 24% reduction in nursing labour cost.
