

Case # 1 - Sadie

Sadie presented 7/24/2019 with a wound of unknown origin under her jaw. The wound was closed surgically but dehiscid shortly thereafter. Hydrofera Blue Classic was applied to the wound and fastened using an ABD pad and the halter. The wound was brought to closure in just over 1 month of treatment with Hydrofera Blue - 8/30/2019.

Sadie and her owner, Kaylee.

Wound prior to starting Hydrofera Blue Classic (7/24/2019)

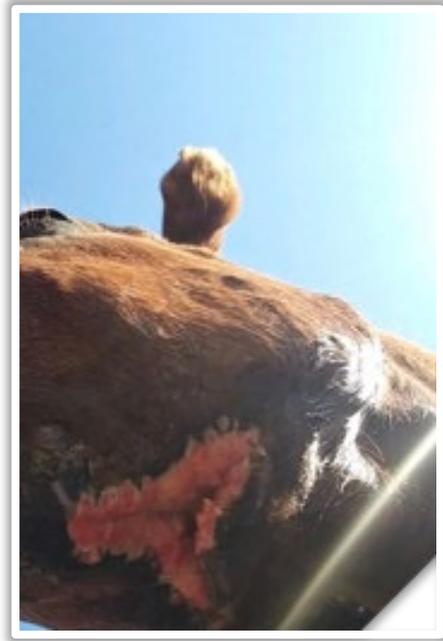

First Application of Hydrofera Blue Classic – 7/24

Hydrofera Blue Classic dressing held in place using ABD pad and halter.

First Dressing Change

The Hydrofera Blue dressing removed the slough and devitalized tissue leaving a healthy wound bed - an ideal environment for healing.

Second Dressing Change – 7/28

Four days after starting treatment with Hydrofera Blue the wound appears to be moving towards closure. Healthy tissue is starting to granulate in.

Wound closure – 8/30

In just over one month of treatment with Hydrofera Blue Classic, the wound was brought to closure.
