

## Clinical benefits

- Manages absorption of secretions
- Broad-spectrum antibacterial protection, provided by two organic pigments: gentian violet and methylene blue
- Non-cytotoxic

#### **Features**

- Sterile, pre-cut, individually wrapped and ready to be used
- Waterproof and breathable cover film
- Semi-permeable outer film for easy cleanups and external element protection

### **Absorption**

 Absorbs and retains exudate within the dressing

# Hydrofera Blue READY® **Tube Site Dressing**

NEW

Polyurethane (PU) Foam Dressing

Experience the trusted reliability of Hydrofera Blue® with the latest addition to the family: **Hydrofera Blue READY® Tube Site Dressing**.

This polyurethane foam dressing, with its intuitive shape and key-hole opening, allows for precise placement and ease of application around tracheostomy tubes and other tube sites. It offers a broad spectrum of antibacterial protection.

The foam is impregnated with two organic pigments, gentian violet and methylene blue, which are effective against gram-positive and gram-negative bacteria and yeast.

### Hydrofera® products have been proven effective against the following:

Bacteria		Yeast
Methicillin-resistant     Staphylococcus     aureus (MRSA)     Staphylococcus aureus     Staphylococcus epidermidis     (coagulase negative)     Pseudomonas aeruginosa     Pseudomonas flourescens     Escherichia coli     Enterococcus faecalis	<ul> <li>Streptococcus pyogenes</li> <li>Klebsiella pneumoniae</li> <li>Proteus mirabilis</li> <li>Proteus vulgaris</li> <li>Enterobacter aerogenes</li> <li>Bacillus subtilis</li> <li>Yersinia enterocolitica</li> <li>Serratia marcescens</li> <li>Streptococcus</li> </ul>	<ul> <li>Candida albicans</li> <li>Candida krusei</li> <li>Candida glabrata</li> </ul>
